

hello

Since establishing our office and soft-seating divisions four decades ago — we have delivered over six million seats. We're proud to be the first South African company to design, produce and distribute furniture for the corporate, retail and hospitality markets in Africa and abroad. Our longstanding fully ISO-certified success, hinges on our core values

of Empower – Passion – Quality and Service. We strive to maintain an 80% ratio of our products being produced locally, with the balance representing prestigious reputable brands from Italy and Japan.

Relatively recently we introduced leading production and materials industry-specialists into our production process. This powerbase has allowed the boldness to create expert, holistically developed seating concepts across the board.

Boasting the ability to design to spec; our other services include engineering, R&D, assembly, quality control, efficient planning (5 assembly and upholstery lines, complex line, fast line) and the capacity to output over 700 chairs daily. Completing the service: we also handle warehousing, dispatch and distribution to markets across Africa.

Keeping abreast of global trends, and the ever-changing needs of our lifelong customers — we embrace a potent vision to shape the future through precisely engineered ergonomics and sophisticated aesthetics.

Products to enrich lives. Products to create an impact in visionary product design, skills empowerment, and the careful consideration of our environmental legacy.

CERTIFICATION + STANDARDS

Seating is a division of Bidvest Office (Pty) Ltd. Our ISO-certifications include; **ISO 9001** (Design and Manufacturing), **ISO 18001** (Health and Safety) and **ISO 14001** (Environmental Management).

Our product design, safety and ergonomics strictly follow the **EN 1335-1, 1335-2** and **BS 3044 standards**; enabling us to carry 5-10 year guarantees. We adhere to a

ETHICS

principle of continuity of design and supply for a period of 10 years.

meets with the above requirements

ENVIRONMENTAL MEASURES

sustainable policy

- We strive to reduce the environmental load in every business activity
- Our efforts include objectives such as benchmarked performance targets, audits and reports on our environmental performance
- To remain highly innovative in product development, processes, technology, materials and techniques
- To meet all legal/other requirements related to environmental regulations
- We will educate and promote our sustainable policy to those within/ associated to our company
- We will ensure that our supply chain

SUSTAINABLE OBJECTIVES

green design

To continually develop environmentally-sensitive designs and processes that incorporate recycling protocols. The material used will be sparing of natural resources and non-toxic.

conservation at the workplace

We will continue to improve our production system to conserve energy.

distribution

We aim to minimise harmful emissions when distributing our products. Product weight has been reduced to ensure less energy is required during transportation.

waste management

To eliminate waste and harmful emissions associated with the manufacturing of our products and services.
